

PANTELEIMON XANTHOS

contact@pantelisxanthos.gr · [LinkedIn](#) · [Personal Website](#)

From an early age, I developed a passion for computers, and at the age of 16 I started developing and managing successful gaming servers. At 14, I assembled my first computer, which helped me better understand how to solve technical problems. I am cooperative and always focus on doing my job as best I can. For almost the last decade I have been involved in gaming projects, which keep me up to date with technological trends and market developments.

PROFESSIONAL EXPERIENCE

2021–2022

MAINTAINER OF ONLINE E-SHOP, [DAFFY SHOP - HOME](#)

The internship was completed in an Online e-shop at a local store with electrical equipment

2022–2023

GREEK MILITARY DUTY,

I have fulfilled my military service obligations to my country.

2023–2023

WEB DEVELOPER, FREELANCING

I have collaborated with private clients to transform their web application concepts into reality, utilizing raw HTML, CSS, and JavaScript for the front-end, and Node.js for the back-end. Due to non-disclosure agreements, I am unable to share specific code or client names.

2017 – TODAY

GAMING SERVER OPERATOR, [GAMING MULTIVERSE](#)

I started getting into server management and development when I was 16, and since then I've steadily built up my skills across multiple programming languages and frameworks. Over the years, I've worked extensively with Lua, HTML, CSS, JavaScript, Svelte, MySQL/MariaDB, and TailwindCSS, creating high-quality scripts and custom features for both FiveM and RedM servers. My focus has always been on improving the player experience with building efficient and reliable systems that run smoothly and add real value to the gameplay. The website for our unofficial team is hosted and maintained entirely by me. I run it on one of my own Linux machines and use Cloudflare for proxying and DNS, making sure everything stays secure and accessible. I also manage the overall infrastructure for our team of three developers. Clear organization, smooth operation, and easy-to-understand systems are key to how we work, and I make sure our environment supports our fast-paced development and continued growth.

2023 – 2026

FULL STACK WEB DEVELOPER/IT DEPARTMENT, [INFOMAX INSURANCE BROKERS](#)

I was working as a Web Developer and IT Engineer at Infomax, where I had the opportunity to work with modern technologies such as SvelteKit, TailwindCSS, and PHP Laravel. This role has allowed me to deepen my expertise in Svelte and gain valuable experience being part of a dynamic team that values innovation and continuous improvement. Alongside my

development work, I also support the company's IT needs across its two offices. My responsibilities include basic system administration tasks, handling workstation setups, resolving day-to-day technical issues, and ensuring the overall environment remains stable and easy for employees to work with. Over the past 2 years, I've also learned to manage and automate the company's backup processes, making sure important data is stored safely and can be restored if needed. While not my primary role, this experience has strengthened my understanding of infrastructure reliability and everyday IT operations.

EDUCATION

2017

CAMBRIDGE LOWER, ΕΥΡΟΓΝΩΣΗ

Degree grade: A
Excellent conduct

2019

GENERAL LYCEUM LEAVING CERTIFICATE,

Overall grade: 15.6/20
Excellent conduct
Participation in many programming programmes

2021

GAME DEVELOPMENT/WEB DESIGN, ΙΕΚ ΔΕΛΤΑ 360

Overall grade: 8.6/10
Lots of positive feedback from teachers about my Projects/Assignments

TECH STACK

- HTML/CSS/Svelte/TailwindCSS/Raw JS-TS/PHP, Laravel
- NodeJS
- MySQL/MariaDB
- cPanel/Plesk
- Linux Servers
- Windows Servers
- Cloudflare/DNS/Domain Management
- Troubleshooting Technical issues on Windows/Linux (Mainly Ubuntu)/Basic Networking/Hardware
- Backup Solutions With Automated cron jobs and sh files using rdiff/rsync

SKILLS

- Driver License A & B category
- Communicative
- Outspoken
- Discretion

- Consistent
- Team spirit
- Organizational
- Flexibility and adaptability
